## READY TO TAKE CARE OF ANY WORKLOAD.

With a print speed of 40 pages per minute in A4, the Kyocera FS-9130DN is ready to carry you through the heaviest of loads without slowing down. Fast, efficient and reliable, this printer also has a highly functional modular design. The paper and finishing options make it easy to fit the printer to your department's precise needs.

- 40 pages per minute in A4, 23 pages per minute in A3
- 64 MB memory standard, upgradeable to 576 MB
- Duplex and network connectivity as standard
- PDF direct printing from USB Flash Memory devices
- Wide range of paper options
- Long-life components and easy maintenance

Easy network access for the entire office is standard. The Kyocera KX Driver works behind the scenes to ensure uncomplicated handling.

This printer has the capacity to work fast. Space for an input of 1,200 sheets and for 500 sheets of printouts are standard.

## A3 MONOCHROME DEPARTMENTAL PRINTER

**ECOSYS** ECOSYS devices are designed to minimise both direct costs and indirect costs such as maintenance, administration and consumables. The cartridge-free system requires only the toner to be replaced. The modular design concept allows you to add workflow enhancing functions and a wide variety of paper handling capabilities as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

### System platform:

The FS-9130DN offers USB, parallel and network connectivity as standard and delivers problem-free system administration. Kyocera's single platform technology means that the same driver can be used for every Kyocera PCL/PostScript print device on the network: from single-user desktop printers to high-end multifunctional systems. Only Kyocera offers this effortless combination of IT sophistication and high-performance paper handling expertise.

### PRESCRIBE IIe:

With the Kyocera page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (even multipart forms) can be created independently of the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

### KM-NET for Client/KM-NET Viewer:

The settings of all printers on the network can be checked visually and amended from any Windows PC. KM-NET for Client enables easy setup and check of the printer status via parallel, USB and network connection. KM-Net Viewer is an advanced printer management software tool using the standardized protocol SNMP.

### INTERFACE

**Standard interface:** Fast Ethernet 10/100Base-TX, High speed bi-directional parallel (IEEE 1284), USB 2.0 (Hi-Speed), USB Host Interface dedicated for USB Flash Memory device, KUIO-LV option interface slot  
**Multiple interface connection (MIC):** Allows simultaneous data transfer via up to four interfaces, with each interface having its own virtual printer.

### OPTIONS
